Module Two (Social) Logical Framework

Parameters	Module Two: Social Module Urgent Issues Facing Migrant Workers		
	Performance Targets	**Monitoring Mechanism**	**Risks and Assumptions**
Inter-modular Goal: long-term, i.e. the *vision*: effective governance in the Motherland, anchored on grassroots economic empowerment and resolution of issues facing migrant and their families, and with raised consciousness of a nation ready to march as one. [Organizing global Filipinos to achieve social, economic and political objectives to benefit them and Global Filipino Nation as a whole]. Social Module Goal: To empower Filipino migrant/immigrants and their families to assert and protect their social, political and economic rights as well as actively develop family/individual resiliency.			
Purpose [the immediate reason for the initiative]: Develop a program and mechanism to redress prioritized urgent issues facing migrant workers, whose families account for more than half of all Filipinos.	• To maximize and systematize already existing initiatives and create a comprehensive program based on collaborative efforts of interested care-providers with the end goal of piloting said program to at least one migrant/immigrant/family of migrant community. • To empower migrants/immigrants and their families by increasing their awareness and therefore access of existing and potential support systems in their area (which includes psychological, social, legal and economic systems of support).	• Periodic Progress Report of core group to GFN • Maintenance of Websites and Database • Regular Assessment of Community-based coordinators. • Consultations	• Willingness of the various care-providers to commit to network structure and collaborative programs.
Outputs or Outcomes [results that can be produced/delivered during implementation] : • Sustainable coordination structure among care-providers that include government and civil society stakeholders. • Increased access of migrants/immigrants and their families to social support services, with special priority to those that cater to the protection of human rights and dignity as well as psychological, social and economic resiliency of families and their individual members. • Increase community- based (RP and jobsite) programs that employ extensive consultative and participatory processes and maximizes local resources and support systems.	• A mechanism to share information, best practices and resources among existing care-providers of overseas workers and their family for the purposes of providing at-risk groups with access to a more comprehensive support systems. Feasible through formulation of coordination guidelines, increasing channels of informal network, forums and planning workshops. Coordination structure can also provide for a more unified voice among care-providers on areas of common concern. • Increased collaborative community based programs, possibly through consultative forums and support group formation, that would increase psychological, economic and social resiliency of migrants and their family left-behind. The network by 3Q '08 would have identified at most three key social issue of priority and designed pre-departure, during separation and upon reintegration programs to address said issue for implementation in selected communities as applicable. • Integration of key insights of care-providers and data from communities into advocacies and legislative lobbying.	• Periodic Progress Report of core group to GFN • Maintenance of Websites and Database • Regular Assessment of Community-based coordinators. • Consultations	• Program Design and implementation were carried out. • Sustained interest of core-group.
Activities [key tasks, steps or stages to be undertaken by the initiative]: • Mapping of Current Initiatives among care-providers, existing human resource capacity and training resources. • Determine coordination mechanisms, roles and responsibilities at local, regional and international levels and come up with key areas of collaboration. • Disseminate Data on Social Support Resources to migrants/immigrants and their families with priority to	3Q '08 Systematizing Coordination 1. Identified qualified organizations and individuals, map of current services, expand pool of available care-providers. 2. Determine coordination mechanisms, roles and responsibilities at local, regional and international levels. 3. Identify key social issues as focal points for collaboration and proceed with program development. Advocacy and Information Dissemination 4. Dialogue with government offices to integrate response activities	•Periodic Progress Report of core group to GFN •Maintenance of Websites and Database •Regular Assessment of Community-based coordinators. •Consultations	Availability of Funding and Human Resources

at-risk groups. • Fund-raise, design, execute and evaluate community based programs based on key areas of coordination.	into national policies, plans and programmes if feasible. 5. Increase community awareness (local and abroad) of existing programs. 6. Encourage schools, parishes and community groups to educate their communities about migration and its corresponding social cost and adopt corresponding interventions. 7. Campaign for corporations to adopt projects in light of increasing social responsibility 1Q '09 <u>Program Development</u> 8. Program Development and execution, preferably in line with any following: (a) informed decision-making and adequate family preparation before departure for overseas work.(b)Protection from illegal recruitment and abusive employers, with increased access to legal and psychological assistance. (c) Creation of support systems for families left behind and those abroad, with a premium on developing communication from a distance, interdependency, values clarification and increased support for at risk groups. (d) effective social, family and economic reintegration.		
Resources Needed [Inputs]: ▪ Consultants ▪ Volunteers & Local Community Organizers ▪ Financial Resources ▪ Physical Resources like venues, materials.	• Creation of a core-group • Fund-raising activities .	Reports by Fundraising Committees and Core Group	Availability of Funding and Human Resources
Implementation Plans [Summary of Operational Plan]: ▪ Formation of core group to initiate research and coordination. ▪ Forum and follow-up for Coordination and Resources ▪ Defining areas of collaborative work based on prioritized social issues. ▪ Program Execution. ▪ Evaluation	Implementation Plan to be structured.	➢ Periodic Progress Report of core group to GFN ➢ Maintenance of Websites and Database ➢ Regular Assessment of Community-based coordinators. ➢ Consultations	Availability of Funding and Human Resources
